Kostitsina street, 19

Dear Danil,

Let me say a few words about my experience of studying natural science at school. I study Physics, Geography, Chemistry and Biology. I like it because I can know much better about the world. I like Biology because ^{it is very interesting} ~~I can know much better~~ to know about animals, nature and yourself. I like Chemistry because it is really interesting lesson. I like Physics because I can know about law of universal gravitation, law of motion and the others. I like Geography because you can know better about ~~our~~ planet. I dislike Biology because you need to do laboratory work. I don't dislike Chemistry, Physics and Geography. Young people could be encouraged to study natural sciences by Internet, books and lessons at school.

Your pen friend,

Stepa.
